PRODUCT OVERVIEW

The past several decades in networking have been defined by static, closed networking solutions designed for the client-server era. Aruba is introducing the Aruba 8400 campus core and aggregation switch, a game-changing solution offering a flexible and innovative approach to dealing with the new application, security and scalability demands of the mobile-cloud and IoT era.

The 8400 provides industry-leading line rate 10GbE/40GbE/100GbE port density, very low latency, and scalability for support of full Internet routes. Together with the compact 1U Aruba 8320 Switch, the 8400 rounds out Aruba’s Mobile First switching portfolio with an enterprise core and aggregation solution that ensures higher performance and higher uptime.

The 8400 is based on the new ArubaOS-CX, a modern software system for the enterprise core that automates and simplifies many critical and complex network tasks, delivers enhanced fault tolerance and facilitates zero-service disruption during planned or unplanned control-plane events. The key innovations in ArubaOS-CX are its micro-services style modular architecture, REST APIs, Python scripting capabilities and the Aruba Network Analytics Engine.

ArubaOS-CX is based on a modular architecture that allows individual process re-startability and upgrades. Its REST APIs and Python scripting enables fine-grained programmability of the switch functions and its unique Aruba Network Analytics Engine provides the ability to monitor and troubleshoot the network easily.

The Network Analytics Engine framework is made up of a time series database and associated REST APIs.

The time series database may be used to store configuration and operational state. Customers can use ArubaOS-CX REST APIs, Python scripting capabilities and time series data to write software modules for trouble shooting problems. The time series data may also be used to analyze trends, identify anomalies and predict future capacity requirements.

KEY FEATURES

- High performance 19.2 terabits per second switching (1.2Tbps/slot) capacity
- Carrier-class high availability with redundant management, power and fabric
- ArubaOS-CX enables automation and programmability using built-in REST APIs and Python scripts
- Intelligent monitoring and visibility with Aruba Network Analytics Engine
- Advanced Layer 2/3 feature set includes BGP, OSPF, VRF, and IPv6
- Compact 8U chassis with high density, line rate 10GbE/40GbE/100GbE connectivity
- Multi-chassis link aggregation
### FEATURES AND BENEFITS

**Product architecture**
- ArubaOS-CX
  - Modular, Linux based and built with OVSDB to support a database-centric operating system.
  - Distributed architecture with separation of data and control planes.
  - Includes independent monitoring and restart of individual software modules, and enhanced software process serviceability functions.
  - Allows individual software modules to be upgraded for higher availability.
- Network Analytics Engine
  A first of a kind built-in framework for monitoring, troubleshooting and capacity planning.

**Performance**
- High-speed fully distributed architecture
  Provides up to 19.2 Tbps switching capacity with up to 7,142 billion packets per second (BPPS) for throughput; all switching and routing is performed in the line modules; meets the demands of bandwidth-intensive applications today and in the future.
- Scalable system design
  Provides investment protection to support future technologies and higher-speed connectivity.

**Connectivity**
- High-density port connectivity
  Supports up to 8 line modules; a 32-port 10 Gigabit Ethernet with MACsec in HW, an 8-port 40 Gigabit Ethernet, and a 6-port 40/100 Gigabit Ethernet module.
- Jumbo frames
  Allows high-performance backups and disaster-recovery systems; provides a maximum frame size of 9K bytes.
- Loopback
  Supports internal loopback testing for maintenance purposes and an increase in availability; loopback detection protects against incorrect cabling or network configurations and can be enabled on a per-port or per-VLAN basis for added flexibility.
- Flexible port selection
  Provides a combination of fiber and copper transceiver to support 1000BASE-T and 10GBASE-T copper solution.
- Packet storm protection
  Protects against unknown broadcast, unknown multicast, or unicast storms with user-defined thresholds.

**Quality of Service (QoS)**
- Powerful QoS feature
  Supports the following congestion actions: strict priority (SP) queuing and weighted round robin.

**Resiliency and high availability**
- Redundant and load-sharing fabrics, management, fan assemblies, and power supplies
  Increases total performance and power availability while providing hitless, stateful failover.
- All hot-swappable modules
  Allows replacement of modules without any impact on other modules.
- Separate data and control paths
  Separates control from services and keeps service processing isolated; increases security and performance.
- Passive design system
  All active chassis components are field replaceable for increased reliability.
- VRRP
  Allows groups of two routers to dynamically back each other up to create highly available routed environments.
- Unidirectional Link Detection (UDLD)
  Monitors link connectivity and shuts down ports at both ends if unidirectional traffic is detected, preventing loops in STP-based networks.
- IEEE 802.3ad LACP
  Supports up to 128 trunks, each with eight links per trunk; and provides support for static or dynamic groups and a user-selectable hashing algorithm.
- Multiple internal power supplies
  Provides high reliability, requiring only two power supplies to support a fully populated Aruba 8400 and adding two more gives the solution N+N power redundancy.

**Virtual private network (VPN)**
- Generic Routing Encapsulation (GRE)
  Transports Layer 2 connectivity over a Layer 3 path in a secured way; enables these aggregation of traffic from site to site.

**Management**
- Management interface control
  Enables or disables each of the following interfaces depending on security preferences: console port, or reset button.
- Industry-standard CLI with a hierarchical structure
  Reduces training time and expenses, and increases productivity in multivendor installations.
Management security
Restricts access to critical configuration commands; offers multiple privilege levels with password protection; ACLs provide SNMP access; local and remote syslog capabilities allow logging of all access

SNMP v2c
Support for SNMP; provides full support of industry-standard Management Information Base (MIB) plus private extensions

sFlow® (RFC 3176)
Provides scalable ASIC-based wire speed network monitoring and accounting with no impact on network performance; this allows network operators to gather a variety of sophisticated network statistics and information for capacity planning and real-time network monitoring purposes

Remote monitoring (RMON)
Uses standard SNMP to monitor essential network functions and supports events, alarms, history, and statistics groups as well as a private alarm extension group

TFTP and SFTP support
Offers different mechanisms for configuration updates; trivial FTP (TFTP) allows bidirectional transfers over a TCP/IP network; Secure File Transfer Protocol (SFTP) runs over an SSH tunnel to provide additional security

Debug and sampler utility
Supports ping and traceroute for both IPv4 and IPv6

Network Time Protocol (NTP)
Synchronizes timekeeping among distributed time servers and clients; keeps timekeeping consistent among all clock-dependent devices within the network so the devices can provide diverse applications based on the consistent time

IEEE 802.1AB Link Layer Discovery Protocol (LLDP)
Advertises and receives management information from adjacent devices on a network, facilitating easy mapping by network management applications

Dual flash images
Provides independent primary and secondary operating system files for backup while upgrading

Multiple configuration files
Stores easily to the flash image

Layer 2 switching

VLAN
Supports up to 4,096 port-based or IEEE 802.1Q-based VLANs; and supports MAC-based VLANs, protocol-based VLANs, and IP-subnet-based VLANs for added flexibility

Bridge Protocol Data Unit (BPDU) tunneling
Transmits STP BPDUs transparently, allowing correct tree calculations across service providers, WANs, or MANs

Port mirroring
Duplicates port traffic (ingress and egress) to a local or remote monitoring port; supports 4 mirroring groups, with an unlimited number of ports per group

STP
Supports standard IEEE 802.1D STP, IEEE 802.1w Rapid Spanning Tree Protocol (RSTP) for faster convergence, and IEEE 802.1s Multiple Spanning Tree Protocol (MSTP)

Internet Group Management Protocol (IGMP)
Controls and manages the flooding of multicast packets in a Layer 2 network

Per-VLAN spanning tree plus (PVST+)
Allows each VLAN to build a separate spanning tree to improve link bandwidth usage in network environments with multiple VLANs

Layer 3 services

Address Resolution Protocol (ARP)
Determines the MAC address of another IP host in the same subnet; supports static ARPs; gratuitous ARP allows detection of duplicate IP addresses; proxy ARP allows normal ARP operation between subnets or when subnets are separated by a Layer 2 network

UDP helper
Redirects UDP broadcasts to specific IP subnets to prevent server spoofing

Dynamic Host Configuration Protocol (DHCP)
Simplifies the management of large IP networks and supports client; DHCP Relay enables DHCP operation across subnets

Domain Name System (DNS)
Provides a distributed database that translates domain names and IP addresses, which simplifies network design; supports client and server
**Layer 3 routing**

- **Static IPv4 routing**
  Provides simple manually configured IPv4 routing

- **Open shortest path first (OSPF)**
  Delivers faster convergence; uses link-state routing

  Interior Gateway Protocol (IGP), which supports ECMP, NSSA, and MD5 authentication for increased security and graceful restart for faster failure recovery

- **Border Gateway Protocol 4 (BGP-4)**
  Delivers an implementation of the Exterior Gateway Protocol (EGP) utilizing path vectors; uses TCP for enhanced reliability for the route discovery process; reduces bandwidth consumption by advertising only incremental updates; supports extensive policies for increased flexibility; scales to very large networks

- **IP performance optimization**
  Provides a set of tools to improve the performance of IPv4 networks; includes directed broadcasts, customization of TCP parameters, support of ICMP error packets, and extensive display capabilities

- **Static IPv6 routing**
  Provides simple manually configured IPv6 routing

- **Dual IP stack**
  Maintains separate stacks for IPv4 and IPv6 to ease the transition from an IPv4-only network to an IPv6-only network design

- **OSPFv3**
  Provides OSPF support for IPv6

- **Equal-Cost Multipath (ECMP)**
  Enables multiple equal-cost links in a routing environment to increase link redundancy and scale bandwidth

**Security**

- **TAA Compliance**
  The Aruba 8400, a TAA compliant product, with the ArubaOS-CX uses FIPS 140-2 validated cryptography for protection of sensitive information

- **Access control list (ACL)**
  Supports powerful ACLs for both IPv4 and IPv6; ACLs are used for filtering traffic to prevent unauthorized users from accessing the network, or for controlling network traffic to save resources; rules can either deny or permit traffic to be forwarded; rules can be based on a Layer 2 header or a Layer 3 protocol header

- **Remote Authentication Dial-In User Service (RADIUS)**
  Eases security access administration by using a password authentication server

- **Terminal Access Controller Access-Control System (TACACS+)**
  Delivers an authentication tool using TCP with encryption of the full authentication request, providing additional security

- **Management logon security**
  Helps secure CLI logon by optionally requiring either RADIUS or TACACS+ authentication

- **Secure shell (SSHv2)**
  Uses external servers to securely log in to a remote device; with authentication and encryption, it protects against IP spoofing and plain-text password interception; increases the security of Secure FTP (SFTP) transfers

**Convergence**

- **Protocol Independent Multicast (PIM)**
  Defines modes of IPv4 multicasting to allow one-to-many and many-to-many transmission of information; supports PIM, Sparse Mode (SM)

- **Internet Group Management Protocol (IGMP)**
  Utilizes Any-Source Multicast (ASM) to manage IPv4 multicast networks; supports IGMPv1, v2, and v3

- **Multicast VLAN**
  Allows multiple VLANs to receive the same IPv4 multicast traffic, lessening network bandwidth demand by reducing multiple streams to each VLAN

**Additional information**

- **Green initiative support**
  Provides support for RoHS and WEEE regulations

**Warranty and support**

- **5-year Warranty**
  See hpe.com/networking/warrantysummary for warranty and support information included with your product purchase.

- **Software releases**
  To find software for your product refer to hpe.com/networking/support; for details on the software releases available with your product purchase, refer to hpe.com/networking/warrantysummary.

**SPECIFICATIONS**

**Line modules and slots**

- Supports a maximum of 256 10GbE (SFP/SFP+) ports, or 64 40GbE (QSFP+) ports, or 48 ports 40/100GbE (QSFP28) combination

- Eight slots for line modules
Module VoQ
• 1.5GB for JL363A and JL365A
• 3GB for JL366A

Additional ports and slots
• 2 Management Module slots
• 3 Fabric Module slots
• 4 Power Supply slots

Power supplies
• 4 power supply slots
• 2 minimum power supply required for a fully loaded chassis (or with 8 Line Modules)

Fan tray
• Included with JL376A

Physical characteristics
• Dimensions: 17.4(w) x 26(d) x 13.8(h) in.
  (44.1 x 66.0 x 35.1 cm) (8U height)
• Weight
  - Empty configuration weight: 76 lbs (34 kg)
  - JL376A weight: 164 lbs (74 kg)
  - Full configuration weight: 241 lbs (109 kg)

Mounting and enclosure
• Mounts in an EIA standard 19-inch rack or other equipment cabinet (hardware included); horizontal surface mounting only

Reliability
• 99.999%

Environment
• Operating: 32°F to 104°F (-0°C to 40°C) with 5% to 95%, non-condensing
• Non-Operating: -40°F to 158°F (-40°C to 70°C) with 5% to 95%, non-condensing
• Max Operating Altitude: Up to 10,000ft (3.048 Km)
• Max Non-Operating Altitude: Up to 30,000ft (9.144 Km)
• Acoustics
  - Sound Power (LWAd) 7.3 Bel
  - Sound Pressure (LpAm) (Bystander) 55.6 dB

Electrical characteristics
• Frequency: 47-63 Hz
• AC voltage: 90 – 140/180 – 264 VAC
• DC voltage
• Current: 16 A
• Power output: 2750 W

Safety
• EN62368-1:2014
• IEC 60950-1:2005 Ed.2; Am 1:2009+A2:2013
• IEC62368-1, Ed. 2
• IEC60825:2007 (Applies to products with lasers)
• UL60950-1, CSA 22.2 No 60950-1
• UL62368-1 Ed. 2

Emissions
• VCCI Class A; EN 55022 Class A; CISPR 22 Class A; IEC/EN 61000-3-2;
• IEC/EN 61000-3-3; ICES-003 Class A; AS/NZS CISPR 22 Class A; FCC
• (CFR 47, Part 15) Class A; GB9254
• EN55032:2012 Class A
• CISPR32:2012 Class A

Immunity
• Generic: Directive 2014/35/EU
• ESD: EN 61000-4-2
• Radiated: EN 61000-4-3
• EFT/Burst: EN 61000-4-4
• Surge: EN 61000-4-5
• Conducted: EN 61000-4-6
• Power frequency magnetic field: IEC 61000-4-8
• Voltage dips and interruptions: EN 61000-4-11
• Harmonics: EN 61000-3-2, IEC 61000-3-2
• Flicker: EN 61000-3-3, IEC 61000-3-3

MTBF (Hours)
• 271,844, Aruba 8400X 32-port 10GbE SFP/SFP+ with MACsec Advanced Module (JL363A)
• 370,024, Aruba 8400X 8-port 40GbE QSFP+ Advanced Module (JL365A)
• 301,837, Aruba 8400X 6-port 40GbE/100GbE QSFP28 Advanced Module (JL366A)
• 354, 650, Aruba 8400X 7.2Tbps Fabric Module (JL367A)
• 500,465, Aruba 8400 Management Module (JL368A)
• 10,560,922, Aruba X731 Fan Tray (JL369A)
• 3,571,429, Aruba 8400 Fan for X731 Fan Tray (JL370A)
• 2,668,882, Aruba 8400 1 Fan Tray and 6 Fans Bundle (JL371A)
Management
• SNMP; RJ-45 serial; USB micro USB console; RJ-45 Ethernet port

Services
• Refer to the Hewlett Packard Enterprise website at hpe.com/networking/services for details on the service-level descriptions and product numbers. For details about services, and response times in your area, please contact your local Hewlett Packard Enterprise sales office.

BUNDLES, MODULES AND ACCESSORIES
Aruba 8400 Bundles
• JL375A Aruba 8400 Bundle includes: Aruba 8400 8-slot chassis, 3 x Fan Trays, 18 x Fans, Cable Manager, X462 2-post Rack Rail Kit
• JL376A Aruba 8400 Bundle includes: Aruba 8400 8-slot chassis bundle (JL375A), 1 x Management Module, 3 x Power Supplies, 2 x 8400X Fabric Modules, 1 x 32-port 10G Module, 1 x 8-port 40G Module

Modules
• Aruba 8400X 32-port 10GbE SFP/SFP+ with MACsec Advanced Module (JL363A)
• Aruba 8400X 8-port 40GbE QSFP+ Advanced Module (JL365A)
• Aruba 8400X 6-port 40GbE/100GbE QSFP28 Advanced Module (JL366A)
• Aruba 8400X 7.2Tbps Fabric Module (JL367A)
• Aruba 8400 Management Module (JL368A)
**Accessories**
- Aruba X731 Fan Tray (JL369A)
- Aruba 8400 Fan for X731 Fan Tray (JL370A)
- Aruba 8400 1 Fan Tray and 6 Fans Bundle (JL371A)

**Power supply**
- Aruba X382 54VDC 2700W AC Power Supply (JL372A)

**Mounting kit**
- Aruba X464 4-post Rack Rail Kit (JL373A)
- Aruba X462 2-post Rack Rail Kit (JL374A)

**Console Cable**
- Aruba X2C2 RJ45 to DB9 Console Cable (JL448A)

**Transceivers**
- HPE X121 1G SFP LC SX Transceiver (J4858C)
- HPE X121 1G SFP LC LX Transceiver (J4859C)
- HPE X121 1G SFP LC LH Transceiver (J4860C)
- HPE X121 1G SFP RJ-45 T Transceiver (J8177C)
- HPE X242 10G SFP+ to SFP+ 1m DAC Cable (J9281B)
- HPE X242 10G SFP+ to SFP+ 3m DAC Cable (J9283B)
- HPE X242 10G SFP+ to SFP+ 7m DAC Cable (J9285B)
- HPE X132 10G SFP+ LC SR Transceiver (J9150A)
- HPE X132 10G SFP+ LC LR Transceiver (J9151A)
- HPE X132 10G SFP+ LC ER Transceiver (J9153A)
- HPE X132 10G SFP+ LC LRM Transceiver (J9152A)
- HPE X242 40G QSFP+ to QSFP+ 1m DAC Cable (JH234A)
- HPE X242 40G QSFP+ to QSFP+ 3m DAC Cable (JH235A)
- HPE X242 40G QSFP+ to QSFP+ 5m DAC Cable (JH236A)
- Aruba 40G QSFP+ LC BiDi 150m MMF 2-strand Transceiver (JL308A)
- HPE X142 40G QSFP+ MPO SR4 Transceiver (JH231A)
- HPE X142 40G QSFP+ MPO eSR4 300M XCVR (JH233A)
- HPE X142 40G QSFP+ LC LR4 SM Transceiver (JH232A)
- Aruba 100G QSFP28-QSFP28 5m DAC Cable (JL307A)
- Aruba 100G QSFP28 MPO SR4 100m 12-fiber MPO OM3 MMF Transceiver (JL309A)
- Aruba 100G QSFP28 LC LR4 10km SMF 2-strand Transceiver (JL310A)
