The Aruba AirMesh MST200 outdoor wireless mesh access router delivers high-performance outdoor wireless mesh connectivity for remote locations and devices such as IP video surveillance cameras and digital signage.

Ruggedized and hardened to withstand extreme environmental conditions, the MST200 is ideal for providing 802.11n connectivity in metropolitan and industrial areas, oilfields, mines, shipping ports, traffic corridors and large public areas. Supporting data rates up to 300 Mbps, the MST200 is a reliable and cost-effective alternative to cabling or fiber.

Running the Aruba MeshOS operating system, the MST200 features a single 5-GHz 2x2 MIMO radio with dual spatial streams and patented Adaptive Wireless Routing™ (AWR™) technology. Together, these features offer unparalleled speed, reliability, and low latency for voice, video and other real-time multimedia-grade applications.

**VIDEO OPTIMIZATION TECHNOLOGY**

The MST200 also ensures the delivery of HD-quality video from surveillance cameras, monitors and recording systems using Active Video Transport™ (AVT™) technology. Inherent in the Aruba MeshOS, AVT uses deep packet-inspection, MAC protocol optimization, in-network retransmission protocol and adaptive video jitter removal to provide enhanced video at up to 30 frames per second across the distributed wireless mesh.
