ARUBA NETWORKS AND LANSCHOOL
Delivering the richest 1:1 classroom experience

One-to-one classroom initiatives provide a great opportunity for schools to leverage new technologies and devices to create an exceptionally rich and interactive learning environment.

However, without a robust Wi-Fi infrastructure and the right classroom management tools, new digital classrooms can become a costly investment and a frustrating experience for teachers and students.

Aruba has partnered with Stoneware to solve this problem and deliver industry-leading Wi-Fi, along with easy-to-use classroom management tools with LanSchool Lite+, offered exclusively to Aruba customers, free of charge.

ARUBA INSTANT + LANSCHOOL = RICHEST 1:1 CLASSROOM EXPERIENCE

Using LanSchool Lite+ with an Aruba wireless LAN enables a digital classroom experience with some powerful benefits:
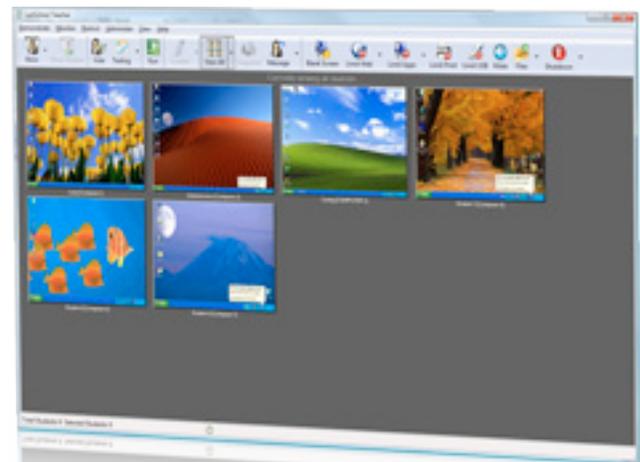

- High-performance, cost-effective controllerless Wi-Fi for high density classrooms to ensure that students have an uninterrupted and engaging learning experience that uses video and multimedia content over Wi-Fi. With faster download speeds and a reliable network connection, it's easy for teachers to bring their curriculum to life.
- Purpose-built classroom tools empower teachers and ensure student productivity. LanSchool Lite+ helps teachers remove distractions and improve learning, providing them with a full view of student desktops from their own computer so they can launch websites, block applications and keep students on task.
- To support BYOD, the ClearPass Access Management System from Aruba lets a cost-effective mix of district-issued and personally-owned mobile devices coexist on the same Wi-Fi network. Schools get a simpler way to manage devices, apps and network policies to control student activity and securely onboard all devices.

LANSCHOOL LITE+ LETS TEACHERS FOCUS ON TEACHING

LanSchool is an award-winning classroom management solution known for its simplicity, reliability and ease of use. It lets teachers leverage the rich learning experience that laptops, tablets and smartphones can offer, while minimizing distractions they can cause in classrooms.

LanSchool Lite+ is a special version of Stoneware's LanSchool Lite software, developed exclusively for Aruba customers. It allows teachers to monitor up to 3,000 students per console and includes an extensive array of features:

- Co-browsing capability
- Web access control (on/off)
- Real-time computer thumbnail monitoring and battery status
- View of students' active application and last visited website
- Full screen view of student's monitors
- Student ability to ask questions electronically
- Creation of class lists
- Password or Active Directory-based security models
- Pairing with Teacher's Assistant for the Apple iPad

ABOUT STONEWARE

Established in 2000, and acquired by Lenovo in 2012, Stoneware is a manufacturer of cloud computing and classroom management software. Stoneware's Unified Cloud Platform lets IT provide users with access to their files, applications and reports from a universal webDesktop. With the acquisition of LanSchool Technologies in 2011, Stoneware provides award-winning classroom management and monitoring software known for being reliable, simple and easy-to-use. Stoneware is headquartered in Indianapolis and serves clients in public, commercial, manufacturing, and healthcare.

ABOUT ARUBA NETWORKS

Aruba Networks (NASDAQ:ARUN) is a leading provider of next-generation network access solutions for the mobile enterprise. Its Mobile Virtual Enterprise (MOVE) architecture unifies wired and wireless network infrastructures into one seamless access solution, enabling entities of all sizes to securely address the Bring Your Own Device (BYOD) phenomenon, dramatically improving productivity and lowering capital and operational costs.

Based in Sunnyvale, California, Aruba has operations throughout the Americas, Europe, Middle East, Africa and Asia Pacific regions.
