

## **Statement on Accessibility and Section 508**

### ***Section 508 Background***

In 1998, Congress amended the Rehabilitation Act to require Federal agencies to make their electronic and information technology accessible to people with disabilities. Inaccessible technology interferes with an individual's ability to obtain and use information quickly and easily. Section 508 was enacted to eliminate barriers in information technology, to make available new opportunities for people with disabilities, and to encourage development of technologies that will help achieve these goals. The law applies to all Federal agencies when they develop, procure, maintain, or use electronic and information technology. Under Section 508 (29 U.S.C. ' 794d), agencies must give disabled employees and members of the public access to information that is comparable to the access available to others.

### ***Aruba Product Compliance***

Aruba Mobility Controllers offer remote configuration and monitoring through the use of a command-line interface (CLI). CLI-based applications are fully accessible to assistive technology such as a screen-reader, and keyboard entry without use of a mouse. The ArubaOS CLI conforms to Section 508.

Other Aruba products, including the ArubaOS WebUI, AirWave Management Suite, and RFprotect Distributed have not yet been evaluated for Section 508 compliance.

### ***Aruba Documentation Compliance***

The ArubaOS Command Line Reference Guide, a companion to the ArubaOS CLI, is an Adobe Portable Document Format (PDF) file that has been specifically designed for use with assistive technology such as screen readers. The ArubaOS CLI Reference Guide can be found on the Aruba support website.
