Based on expertise gained from monitoring millions of network devices, you get significant service insights from our installed base, with AIOps and service data analytics.

Network as a Service from Aruba, an HPE GreenLake service

As device counts grow, endpoints diversify, and connectivity demands increase, planning your network and keeping up with change can be overwhelming. You need the flexibility of cloud agility, security, scale, and compliance — but how can you get it?

What's the cost of network status quo?
IT distraction and business disruption.

IT's time is spent trying to diagnose and fix issues.

170% believe their company's current networking infrastructure prevents them from addressing the innovative use cases they would like to target.

Network as-a-Service Brings Flexibility to the Edge
