

ORDERING GUIDE

7000/7200 SERIES AS SD-WAN GATEWAYS

SD-WAN GATEWAY HARDWARE

In addition to the [9004 Series Gateways](#), the 7000 Series and 7200 Series Mobility Controllers can be re-purposed as SD-WAN gateways by applying an appropriate SD-WAN license.

The 7000 Series are primarily deployed in branch or remote networks as “branch gateways”, while the 7200 Series are primarily deployed as headend gateways within data centers. For virtual gateway deployments within a public cloud infrastructure, refer to the [Aruba SD-WAN datasheet](#) for information.

SD-WAN FOUNDATION LICENSE

An Aruba Central SD-WAN Foundation or Foundation Base Capacity license is required for each gateway/controller to enable SD-WAN functionality and cloud management.

The SD-WAN license enables full bandwidth capacity, up to the limit noted per gateway datasheet. For micro-branch deployments, the 7005 and 7008 (like the 9004) can be ordered with a base capacity license that supports up to 75 client devices each. In high availability deployments, an additional subscription license per gateway is required.

Please note, that a single gateway/controller cannot be simultaneously used for both controller functionality and SD-WAN gateway functionality.

Each SD-WAN license includes software support and TAC/phone support. For SD-WAN hardware replacement support, order hardware-only support SKUs through your Aruba reseller (VAR).
