

HPE Aruba Networking Data Center Networking CX Switch trade-up program

Get paid-up when you trade-up

High performance compute, faster storage and the move to hybrid cloud are driving the need for organizations to refresh their aging data center network switches to more modern, higher scale 25/100/400 Ethernet fabrics.

Next-generation data center switching from [HPE Aruba Networking](#) can help by delivering unprecedented scalability, performance, and increased security.

Refresh and recycle your aging network infrastructure while putting it to good use towards the purchase of new HPE Aruba Networking data center switches.

We are pleased to offer customers a lucrative trade-up credit for their existing legacy 10/25G Ethernet switching hardware and optics when they purchase new HPE Aruba Networking 25/100/400G switching solutions.

For a limited time, customers who purchase HPE Aruba Networking CX 10K/9300/83xx switches to replace qualified Cisco Nexus 9000, 5000, 3000, or 2000 or Juniper QFX 5100/5110, and Arista switches are eligible to participate.

Customers can receive up to a \$5,000 credit per eligible switch (like for like trade-up) and an additional \$1,000 credit for each HPE Aruba Networking 100G/400G transceiver they purchase as part of the solution. Terms and conditions apply.

Smarter sustainable IT

Customers will have the option to either self-decommission their legacy switches or leverage our [HPE Asset Upcycling](#) service to recycle their hardware in a secure, globally consistent, and environmentally responsible manner.

Last year HPE Technology Renewal Centers processed ~3.6 million IT assets, remarketing 82% for a second life. Utilizing HPE Tech Renewal Centers, the largest IT manufacturer-owned refurbishing centers in the world, customers recover value from legacy data center, workplace, print, and edge technology, regardless of manufacturer, in a secure, globally consistent, and environmentally friendly manner.
