Turbocharge your network with HPE Aruba Networking Wireless Operating System AOS-10

Meet HPE Aruba Networking Wireless Operating System AOS-10, the next-generation distributed operating system for HPE Aruba Networking Central-managed access points and gateways.

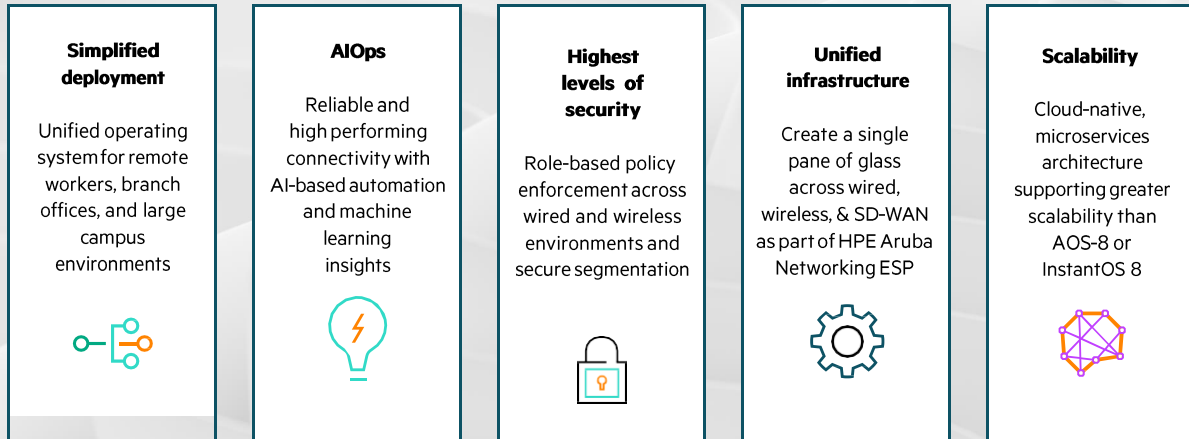

Whether you run a small office, a mid-size company, or a large enterprise, digital acceleration requires you to deliver new, flexible services and adopt new technologies to keep pace and be ready for the future.

- **Embedded security:** AOS-10 utilizes built-in deep packet inspection that classifies thousands of applications for granular, per-app traffic enforcement, allowing IT to block, prioritize, and rate-limit bandwidth for an individual or groups of apps.
- **Get things done, faster and easier:** AOS-10 utilizes AI-powered HPE Aruba Networking AirMatch to optimize daily Wi-Fi experience, and includes an IoT transport service that enables organizations to rapidly deploy new use-cases. See [Aruba Technology Partners](#) for certified integrations.
- **Productivity without the downtime:** AOS-10 supports live, in-service upgrades to perform network maintenance without impacting end-user connectivity.

HPE Aruba Networking's products and solutions are built to scale seamlessly with your business growth.

Unlock more scale, security and AI-powered optimization

HPE Aruba Networking Wireless Operating System AOS-10 and HPE Aruba Networking Central can bring operational enhancements on every level to organizations:

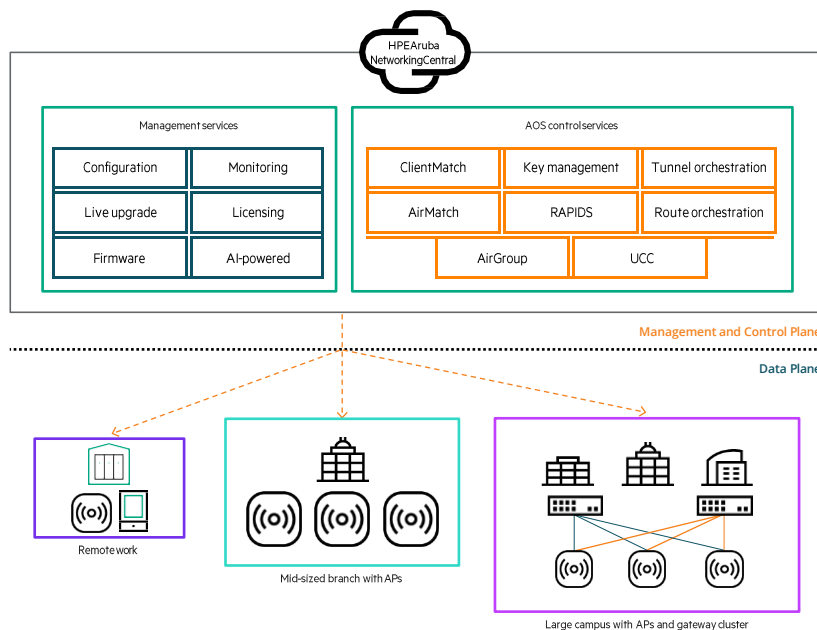

HPE Aruba Networking Central with AOS-10

How is AOS-10 different from AOS-8?

- AOS-10 supports bridge mode and introduces tunnel and mixed mode—bringing higher scale and security to cloud Wi-Fi.
- AOS-10 integrates SD-Branch and microbranch functionality—extending networks from campus to branch and home offices.
- New key capabilities for AP only deployment mode (without controller) in AOS-10 include live upgrades, AirMatch, and IoT operations dashboard.

Distributed AOS-10 supports APs and optional gateways

Promotional program
