

SERVICE BRIEF

CLEARPASS GUEST SKIN SERVICE

Figure 1. All skins include large-screen and mobile templates. This example shows customization for HPE Aruba Networking Atmosphere registrations.

YOUR GUESTS, YOUR BRAND

Give your guest and operator portals a professional look and feel that matches your website. ClearPass Guest Skins are optimized for smartphones, tablets, and laptops.

JUST FOLLOW THESE SIMPLE STEPS

- Provide HPE Aruba Networking with the HPE support account email address associated with your ClearPass installation.
- Provide the public website URL to be used as the underlying template for your skin.
- Optionally, you may provide a fully-packaged, responsive template (HTML, CSS and high-resolution images), which we will convert into a skin plugin.

WHAT WE DELIVER

HPE Aruba Networking will deliver a skin based off your existing website. The skin plugin will be designed to deliver an exceptional user experience when using laptops, tablets or mobile devices. A custom-branded email receipt for credential delivery is also included. Please note that ClearPass guest policy configurations are not within the scope of this skins service.

ADVANCED CUSTOMIZATION NEEDED?

For custom design and coding that exceed the basic skin deliverables described above, send inquiries for additional pricing and a custom quote to skins@hpe.com.

To purchase HPE Aruba Networking products, contact your HPE Aruba Networking representative or partner.
