March 17, 2005

Dear Aruba Resellers,

Due to enhancements in our product line, we announce today the forthcoming end-of-sale of our AP-52 and AP-52-W products.

Effective June 17, 2005, the AP-52 and AP-52-W access points will no longer be orderable.

We currently have approximately 1000 units in stock. Resellers may place purchase orders until June 16, 2005 or when all units are sold, whichever comes first.

The last shipment date for the AP-52 and AP-52-W is June 30, 2005.

We recommend the AP-70 as a next generation dual radio access point solution. This product is available today.

Sincerely,

Troy A. Wendt
Director, Product Management
Aruba Networks
