End-of-Sale Announcement for the Aruba 800-E Access Multiplexer

Confidentiality Level: Channel Partners

Aruba Networks is announcing end-of-sale for the following product:

PART NUMBER	DESCRIPTION
800-E-SX	Aruba 800-E Access Multiplexer - SPOE, 1000Base-SX GigE
800-E-TX	Aruba 800-E Access Multiplexer - SPOE, 1000Base-T GigE

The above products can be replaced with the following products, which are functionally equivalent.

PART NUMBER	DESCRIPTION
620	Aruba MMC-620 Multi-Service Mobility Controller - 8x 10/100Base-T (RJ-45) 4 supporting PoE, 1x 10/100/1000Base-T (RJ-45), 1x USB ports, (0 AP Support), Unrestricted Regulatory Domain
620-IL	Aruba MMC-620 Multi-Service Mobility Controller - 8x 10/100Base-T (RJ-45) 4 supporting PoE, 1x 10/100/1000Base-T (RJ-45), 1x USB ports, (0 AP Support), Restricted Regulatory Domain - IL
620-US	Aruba MMC-620 Multi-Service Mobility Controller - 8x 10/100Base-T (RJ-45) 4 supporting PoE, 1x 10/100/1000Base-T (RJ-45), 1x USB ports, (0 AP Support), Restricted Regulatory Domain - US

In general, the Aruba 620 when configured as a multiplexer client represents a superset from a functional and performance perspective. However, the Aruba 620 does not provide a 1000Base-SX interface option.

We currently expect to be accepting final orders through January 1, 2010, however this final date will depend on the continued availability of stock and, at Aruba's discretion, the actual end of sale date may be earlier than January 1, 2010. End of support for the product is January 1, 2015. We strongly encourage you to transition all backlog and new business to the Aruba 620 as the recommended solution.

Definitions

- End-of-Sales Announcement (this document): Date of official end-of-sales notice.
- End-of-Sales Date: The last date to order the product through Aruba Networks point-of-sale mechanisms. The product is no longer for sale.
- End-of-Support Date: The last date a product will be supported by Aruba Networks.
