

End-of-Sale Announcement for Legacy (non-802.11n capable) MST200 models

Aruba, a Hewlett Packard Enterprise company is announcing end-of-sale for the following legacy (non-802.11n capable) MST200 Wireless Mesh Router products:

Aruba Part Number	Description
MST2H1FG	MST200, 802.11a 5GHz single radio 400mW (POE, AC, DC models)
MST2H1FA	MST200, 802.11b/g 2.4GHz single radio 400mW (POE, AC, DC models)

The products below are the recommended replacement products for the equivalent ones above. Note that Aruba does not offer a functional replacement for the 2.4GHz model, or any DC powered models. The suggested 5GHz devices should functionally replace the original 5GHz devices, however this is offered as reference information only. Aruba offers no guarantee that the suggested replacement devices will have exactly the same form, function or specification as the phased-out devices.

Aruba Part Number	Description
MST2H13N0	MST200, 2x2 single radio 320mW; 5GHz; POE powered
MST2H13N1	MST200, 2x2 single radio 320mW; 5GHz; AC powered

We currently expect to be accepting final orders through October 31, 2010, however this final date will depend on the continued availability of stock and, at Aruba's discretion, the actual end of sale date may be earlier. End of support for the product is October 31, 2011. We strongly encourage you to transition all backlog and new business to the equivalent replacement products as the recommended solution.
